Assignment 1: Broken access control and logic flaws

Opened: Friday, 28 February 2025, 8:45 AM
Due: Friday, 7 March 2025, 11:59 PM

This assignment is worth **4 points** out of 32 total points. Please find below a list of Portswigger challenges, divided in two categories.

Broken Access Control

- https://portswigger.net/web-security/access-control/lab-unprotected-admin-functionality-with-unpredictable-url
- https://portswigger.net/web-security/access-control/lab-insecure-direct-object-references

Logic Flaws

- https://portswigger.net/web-security/logic-flaws/examples/lab-logic-flaws-high-level
- https://portswigger.net/web-security/logic-flaws/examples/lab-logic-flaws-weak-isolation-on-dual-use-endpoint

Assignment

You are requested to freely choose one challenge from each category, solve it and upload a short screencast on Moodle, where you show your solution at work. You can comment your solution using voice-over for additional clarity, if you like. The screencast must be accompanied by a short PDF document detailing the key steps of your solution and motiva ?

its correctness. The discussion should also integrate a critical analysis of the security issue, i.e., why the application is insecure and what should have been avoided. You must upload one video per challenge and the total length of the videos must not exceed 5/6 minutes.

Further instructions below:

- Feel free to collaborate with other students and to exchange thoughts, however the final videos must be the result of your own work. Do not just replay solutions from other students verbatim.
- Solutions to the challenges are available on Portswigger. You are free to check your solution against the official solution before submission, but please do not look at the solution before you solve the challenge. If you are unable to solve a complicated challenge, you can always submit a simpler challenge that you solved on your own.
- You are encouraged to solve all the proposed challenges. They only require ingredients explained in the course and they are a great learning opportunity for you.

Submission status

This assignment requires submission in groups. You are not a member of any group, so you cannot create a submission. Please contact your teacher to be added to a group. ✖
